

### PROJECT DETAILS

Client: CSBP Wesfarmers  
Location: Kwinana, WA  
Products: Selective Pallet Racking, Radioshuttle™ Racking, Mezzanine Floor, Cantilever Racking, Uni-Shelving  
Industry: Chemicals  
Completion: 2020

### BRIEF

Supply & Installation of a materials handling and storage solution for the stores improvement project. Strict project deliverables included MDR's, ITP's, QA/QC Data, Detailed design and structural engineering certification.

### SOLUTION

Selective Pallet Racking – 100% pallet accessibility to all pallet faces providing the client with optimal flexibility, speed of operation and access.

Radioshuttle™ Racking – Generation RS6.0 shuttle providing 42 pallets deep per lane, high density storage FIFO storage & retrieval method. This Semi-automated solution means the Radioshuttle™ is controlled by the forklift operator with a Remote Controller. The Radioshuttle™ solution is fully integrated to the host Warehouse Management System.

Raised Storage Area – doubles floor space & provides flexible storage arrangement; bespoke floor grating supplied; Engineered & Certified Structure to Australian Standards and BCA.

Accessories supplied included plastic tubs, hanging storage, mesh decking, pivot access pallet gate, Radioshuttle™ safety cart.

All stakeholders can now realise the benefits a combined storage solution would provide, increasing storage space and efficiency.

Elevated Shelving on Mezzanine Floor
